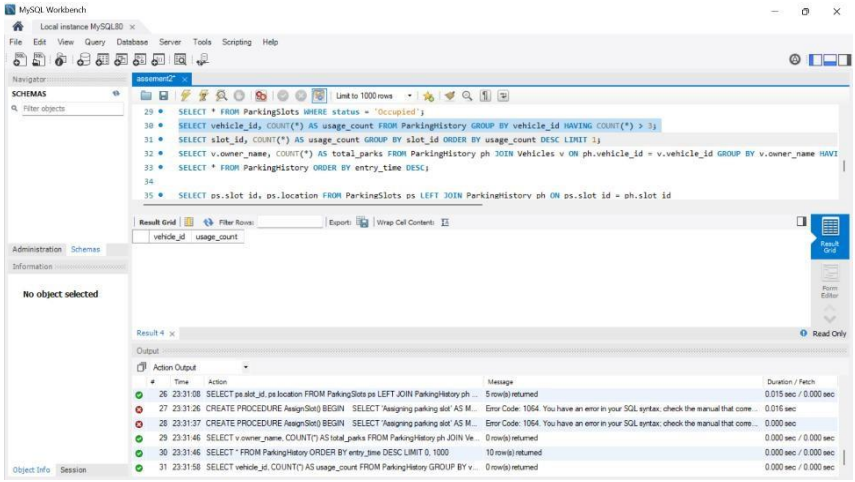
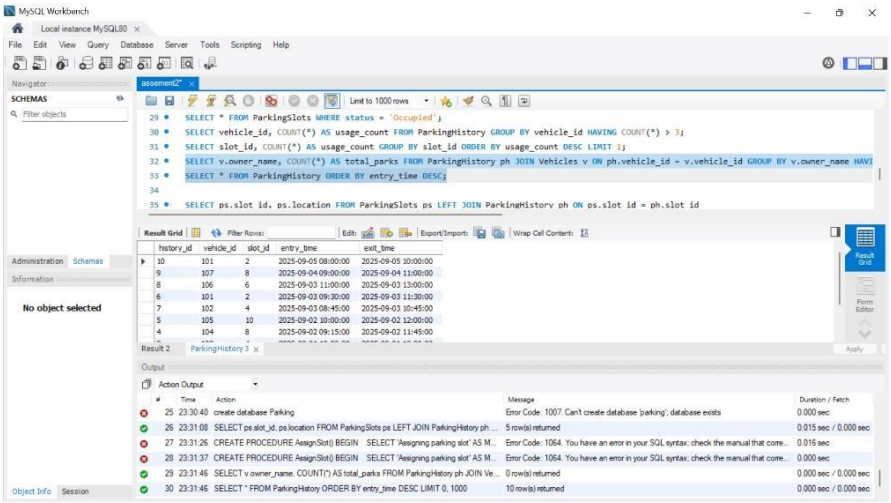
Student Name: Ravi Raj Kumar
UID: 24BCS12288
Branch:BE CSE
Section/Group: 710 'A'
Semester: 3rd
Date of Performance:24.09.25
Subject Name: DBMS
Subject Code:24CSH-204

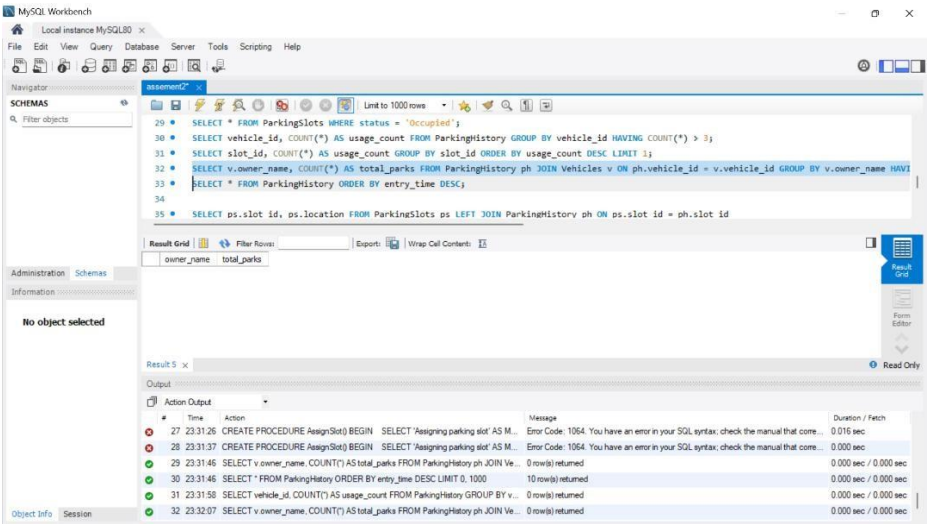
1. **Aim:**
   Set A: Vehicle Parking System

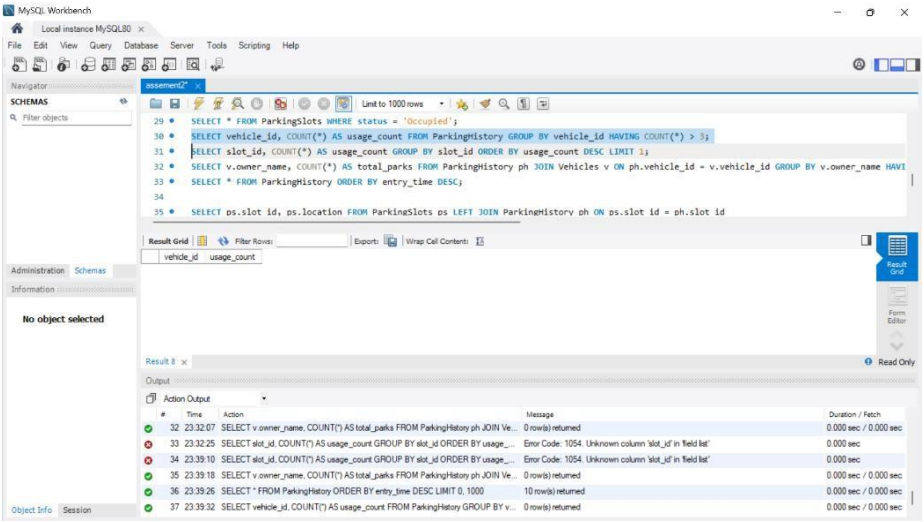
2. **Objective:**
   1. Create the tables:
      - ParkingSlots (slot id, location, type, status CHECK ('Available', 'Occupied'))
      - Vehicles (vehicle id, owner name, contact, vehicle type)
      - ParkingHistory (history id, vehicle id, slot id, entry time, exit time)
   2. Insert at least 10 records in each table.
   3. Perform SQL queries to:
      - Retrieve all occupied parking slots.
      - Identify vehicles that have used the parking facility more than 3 times.
      - Find the busiest parking slot based on usage count.
      - List owners who have parked more than 5 times.
      - Retrieve parking slot usage details sorted by most recent entry time.
      - Find parking slots that have been empty for more than 7 days.
   4. Write an SQL block to: Print 'Assigning parking slot'.

1. **DBMS script and output:**









MySQL Workbench
